4 Our Life — App Store & Google Play QR codes

Vector artwork for print. Generated 2026-10-05 by `scripts/generate-store-qr.js`; every code was decoded after generation and matched its URL exactly.

App Store

https://apps.apple.com/app/id6754759396

62 × 62 mm · ECC Q · v4 · 33×33 modules

Google Play

https://play.google.com/store/apps/details?id=com.fourourlifeapppay.fourourlifeapppay

62 × 62 mm · ECC Q · v7 · 45×45 modules

PRINT SPECIFICATION

- **Do not crop the white margin.** The 4-module quiet zone is part of the code and is included in the 62 mm box.
- **Minimum size** is 14 mm / 18 mm (App Store / Google Play) — the 62 mm layout above is well above it.
- **Distance rule:** viewing distance ÷ 10 = minimum code width. For a roll-up read from 2 m, scale the code to at least 200 mm.
- **Scale from the SVG** (`images/store-qr/*.svg`), never by upscaling a PNG. Regenerate at 2048 px if a raster is required.
- **Reproduce in solid black or #0F172A on white.** Do not tint to a mid-tone brand colour or reverse it out — contrast is what makes it scan outdoors.
- **No logo overlay.** Adding one requires error correction H and an overlay under ~10% of the code area; regenerate the artwork rather than placing a logo on top.
